Information

News & Benefits

Ultra fine punch pattern side panel (2 mm) guarantee a permeability of more than 40% that results in an extremely good washing and sterilisation process.

The fine punched side panel prevents injuries caused by sharp and/or fine instruments and prevents instruments from damage.

The top rim is comprised of a plasma-welded top wire. This finish guarantees simpler cleaning, thus improving the hygiene.

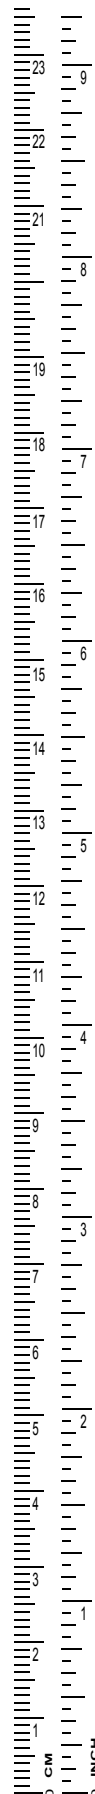

The baskets are made from INOX AISI 304 L stainless steel, which is finished by electrolytic polishing. The composition of the material is verified by an external center of expertise.

The design of the basket precludes hollows or cavities in which dirt could accumulate. The baskets are completely free of welding burrs, openings, distortion of wires or weld discoloration.

Sterilization Accessories

Stainless Steel Screen Baskets

The lids of the stainless steel screen baskets are provided with a quick closure system that allows an easy handling with only one hand.

Our wire baskets can also be coloured with Colorit Dual which is produced especially for medical applications.

This coloured marking serves as facilitation of the work process and additionally if required a chip can be applied for the documentation.

If you have any further inquiries please do not hesitate to contact us. We would be happy to be of your further assistance.

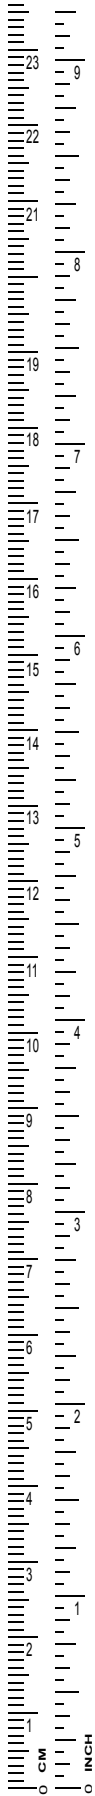

Silicone fixation

The silicone fixation protects your instruments during transportation, sterilization and storage. The partitioning The arrangement of the instruments is flexible and can be adapted to your special requirements.
